Summary

I am a skilled DevOps and Cloud Engineer with experience in designing, implementing, and optimizing cloud infrastructure, automation, and CI/CD pipelines. With expertise in Kubernetes, AWS, Golang, Python, and Infrastructure as Code (IaC), I focus on building scalable, high-availability systems while streamlining deployment workflows. My background includes FinOps pipeline development, cloud cost optimization, and AWS service delivery validation. Passionate about automation and platform engineering, I continuously expand my knowledge through certifications in AWS Solutions Architecture, Data Analytics, and Machine Learning.

Experience

VITRIFI

SOFTWARE ENGINEER

May 2025 → Present

At VitriFi I quickly learned about network engineering, and had started to implement this with software engineering. This included learning about and working with netconf, gnmi and the YANG data model.

PM CONNECT

DEVOPS ENGINEER

November 2022 → May 2025

As a DevOps Engineer, I designed, implemented, and maintained Kubernetes-based infrastructure, ensuring high availability, scalability, and reliability. I developed and optimized CI/CD pipelines, enabling seamless deployment workflows while reducing operational overhead for developers.

Leveraging Golang, Python, and Bash, I built infrastructure automation and deployment tooling, streamlining resource provisioning and improving developer experience. Additionally, I contributed to platform engineering by developing and maintaining an internal CLI tool that simplifies AWS infrastructure management using Infrastructure as Code principles, including

CloudFormation. This work involved working with a wide range of AWS native services, including EKS, ECR, EC2, VPC, S3, Lambda, SQS, SNS, RDS, Glue, Athena, DynamoDB, Control Tower, Organisations, IAM, CloudWatch, Secrets Manager, and more.

Beyond platform engineering, I also provided hands-on support to developers, assisting with application debugging and performance optimization in cloud-native environments, as well as helping implement best practice requirements for ISO27001.

TRANSACT TECHNOLOGY SOLUTIONS

CLOUD ENGINEER

April 2021 → November 2022

At TransACT I worked on the processes and pipelines behind FinOps. Creating, maintaining and re-architecting the current pipeline for better scalability in the future. Completed company projects from end-to-end, from initial concepts to full rollout, for both internal employee use and for customer usage as added value to current product offerings. In addition I helped transACT achieve Service Delivery Program validations.

During my time with TransACT I used a range of technology and services including Athena, Cloud Formation, Data Pipelines, EC2, EMR, Glue, Lambda (Python), Quicksight, Redshift, Step Functions and more. Alongside this I also worked on furthering my education and knowledge of AWS, including earning the Solutions Architect Associate, Data Analytics and Machine Learning and Database speciality certifications.

JUNIOR CLOUD ENGINEER

February 2021 → April 2021

During my first two months at transACT I gained valuable perspective and experience with business to business relationships in technology, as well as experience with WARs, FinOps, and Cloud Architecture.

GENERATION UK AND IRELAND

AWS Re/START GRADUATE

June 2020 → September 2020

This 12 week full time programme covered classroom-based skills development and training on IT fundamentals. During the course I covered Linux, Python and Shell, in addition to AWS. This included learning about and becoming familiar with the monitoring and support of AWS and how to apply these services in the area of compute, storage and networking, including EC2, S3, IAM, VPC, Lambda, Cloud Formation, RDS and Route 53.

Finally, during this programme I also developed my professional skills, resulting in improvements to my verbal and written communication. I also gained experience of explaining technical information and terminology to non technical end users.

RETAIL STAFF, FAST CAR DIRECT

October 2017 → May 2018

CUSTOMER SUPPORT ASSISTANT, MULTIMEDIA INTERNET CAFÉ

August 2009 → October 2017

Education & Certifications

CERTIFICATIONS ([CREDLY](#))

AWS Certified Database Speciality	2022
AWS Certified Solutions Architect Associate	2021
AWS Certified Data Analytics Speciality	
AWS Certified Machine Learning Speciality	
Microsoft Certified: AI Fundamentals	
Microsoft Certified: Azure Fundamentals	2020
AWS Certified Cloud Practitioner	

HEATH PARK BUSINESS & ENTERPRISE COLLEGE

2007 – 2009
